

Gabriel

Full-stack Developer | Xi'an, Shaanxi Province | gguoxingg@gmail.com |
github.com/Chowhound-G

SUMMARY

Full-stack developer familiar with Java, Python, Vue, React, SQL Server, PostgreSQL, automation testing tools, DevOps, and CI/CD. Focused on building maintainable products across frontend, backend, database, testing, and delivery workflows.

CORE SKILLS

Frontend	Vue, React, TypeScript, UI implementation
Backend	Java, Python, API design, service integration
Database	SQL Server, PostgreSQL, SQL modeling, query debugging
Quality and Delivery	Automation testing tools, DevOps, CI/CD, release workflows

SELECTED PROJECTS

- zentao-api-automation - API automation testing project for Zentao and practical QA workflows.
- web-wenxuan - Full-stack ecommerce demo with Vue, Spring Boot, FastAPI, database work, testing, and CI/CD.

WORKING STYLE

- Connect product requirements with dependable implementation across the stack.
- Move comfortably between implementation, testing, debugging, and deployment work.
- Prefer readable code, practical automation, and release habits that reduce operational friction.
